Organized by SEMI

Sponsored by STMicroelectronics

As the voice of the semiconductor equipment and materials industry, SEMI represents member interests throughout the year, working with policymakers and other groups and individuals who are shaping the business environment. Our collective voice, however, is made stronger by active member involvement, so we encourage you to join us in support of our Industry Advocacy endeavors.

Voice of the Industry

SEMI represents the collective interests of its membership, and is an advocate for the industry in the areas of public policy, environment, health and safety, workforce development and investor relations. We engage with important influencers on a global basis to shape a positive future for our members and the world.
