Title of Presentation	IoT and Flexible Hybrid Electronics Smart Wearable Solutions for Consumers and Businesses

Abstract

In recent years, the demand for improving healthcare tracking and people taking their health more seriously have grown with the astounding advancements in wearable technology and IoT helping to enhance the consumer's ability to track their health, lifestyle and fitness journeys.

As wearable technology increases in popularity, businesses have also started to use these devices to help promote health, productivity and safety at the workplace.

Flexible Hybrid Electronics (FHE) can be adapted to fit different smart wearables devices for consumers and businesses, from chest strap, apparel, watch strap, helmet etc.

In this presentation, we will share IoT solutions for FHE and commercialization opportunities.

Biography

Justin has over 20 years of experience and he specializes in content services for mobile and internet, product and program management and is an old hand at operational logistics. At KaHa Justin is responsible for Global operations and deliveries.
