Global Semiconductor Packaging Materials Outlook is a comprehensive market research study that examines semiconductor packaging technology trends and their impact on the packaging materials markets. The report quantifies the packaging materials markets by segment and by region, highlights new opportunities for emerging package form factors, defines supplier market share, and presents market forecasts through 2021.

Global Semiconductor Packaging Materials Outlook is an essential business tool for anyone interested in the plastic packaging materials arena. Packaging materials directly affect the performance, reliability and cost of semiconductors, and advancements in packaging materials technology offer the potential for significant improvement across all these areas.

FEATURES
- Technology trends
- Regional market size
- Five-year market forecasts
- Supplier market share
- Market size in revenue and units
- Capacity and utilization trends
- Supply chain issues

METHODOLOGY

The source of information for this study are in-person interviews with over 150 material suppliers, packaging subcontractors, and semiconductor manufacturers from around the world. The authors of this report used primary research and modeling to develop market size information, and developed five-year market forecasts based on different scenarios of new technology penetration and market growth.
PACKAGING MATERIALS

CONDENSED TABLE OF CONTENTS

1 INTRODUCTION
   Methodology
   Assumptions
   Report Organization

2 SEMICONDUCTOR PACKAGING
   Industry Market Trends
   Regional and Market Issues
   Materials Needs—Customer Input
   End-market Applications

3 SUBSTRATES
   Laminate Substrates
   Build-up Substrates
   Organic Substrates
   Markets and Forecast
   Pricing
   Supply

4 LEADFRAMES
   Technology Trends
   Markets and Forecast
   Supply

5 BONDING WIRE
   Technology Trends
   Markets and Forecast
   Pricing Trends
   Supply

6 MOLD COMPOUNDS
   Technology Trends
   Markets and Forecast
   Supply

7 UNDERFILL MATERIALS
   Capillary Underfill
   Molded Underfill
   Technology Trends
   Markets and Forecast
   Supply

8 LIQUID ENCAPSULANTS
   Technology Trends
   Markets and Forecast
   Supply

9 DIE ATTACH MATERIALS
   Technology Trends
   Markets and Forecast
   Supply

10 SOLDER BALLS
    Technology Trends
    Markets and Forecast
    Supply

11 WAFER LEVEL PACKAGE
    Dielectrics
    Technology Trends
    Markets and Forecast
    Supply

12 PLATING CHEMICALS
    Technology Trends
    Material Development
    Markets and Forecast
    Supply

ABOUT SEMI

SEMI connects over 2,000 member companies and 1.3 million professionals worldwide to advance the technology and business of electronics manufacturing. Since 1970, SEMI has built connections that have helped its members prosper, create new markets, and address common industry challenges together. SEMI maintains offices in Bangalore, Berlin, Brussels, Grenoble, Hsinchu, Seoul, Shanghai, Silicon Valley (Milpitas, California), Singapore, Tokyo, and Washington, D.C.
