

# MEMS & SENSORS FAB REPORT TO 2023

FORECASTS — CAPACITIES — INVESTMENTS

## WORLDWIDE FAB INSIGHTS FROM FRONT-END FACILITIES MAKING MEMS AND SENSORS

The *MEMS & Sensors Fab Report to 2023* tracks more than 400 facilities and more than 230 companies and organizations. Empower your market research, analyze key MEMS and Sensors trends, and improve business planning with this twelve-year report.

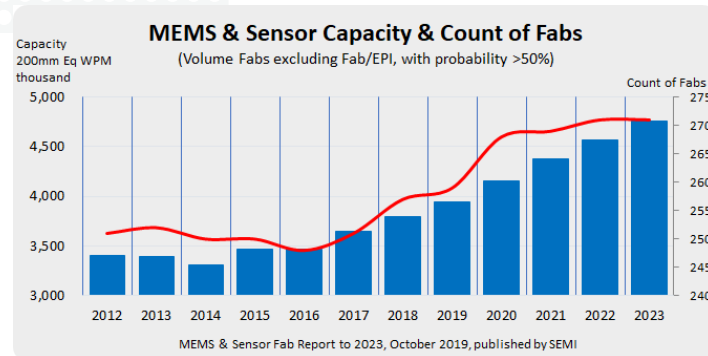

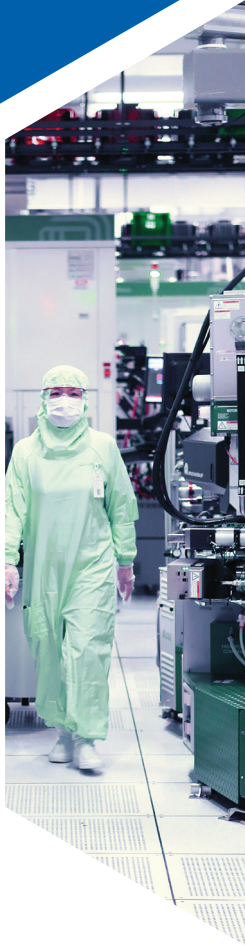

### REPORT HIGHLIGHTS

- Twelve-year report with quarterly forecast data to 2023
- 22 high-level summaries, tables, charts, and graphs for presentations
- Details by quarter and fabs for investments, installed capacities, wafer size, and feature sizes
- Fab demographics, technology, project information, product type, and fab type
- Fab status includes fab closures, transactions, and wafer size conversions

### BENEFITS

- Access current and credible data on worldwide MEMS & Sensors fabs
- Categorization into MEMS, image sensors, and mix of MEMS and image sensors
- Gain insight into up-to-date analysis with verified and validated data on investment, expansion plans transactions
- Access to benchmark data used by financial institutions, industry experts, and top-tier companies worldwide

### 2020 PRICING INFORMATION

	SEMI MEMBER*	NON-MEMBER
<b>MEMS &amp; Sensors Report - Single User</b>	<b>\$2,250</b>	<b>\$3,500</b>
<b>MEMS &amp; Sensors Report - Multi User</b>	<b>\$5,000</b>	<b>\$7,700</b>

\* This pricing does not apply to Individual Members

**HOW TO ORDER:** Visit SEMI® at [www.semi.org/MEMSFabReport](http://www.semi.org/MEMSFabReport)

**APPLICABLE TO:** MEMS manufacturers, Sensors manufacturers, Equipment suppliers, Sales, Marketing, Executives
