

SEMI Global Update

November 10, 2020

Renewable Energy

Growing Wave of Chip Companies Join Global Green Energy Movement

As the world combats climate change, the chip industry continues to build momentum in becoming a better steward of the environment. In July, Taiwan chip giant TSMC ...

Smart Manufacturing

Smart Manufacturing Technology Gives Aging Chipmaking Equipment New Life

Not long after STMicroelectronics opened its first semiconductor plant in Singapore more than 50 years ago, a facility chiefly focused on chip assembly and packaging ...

Standards

A Baseline of Security for Fab Equipment Standards

With the rise of industry 4.0 and smart factories, new intelligent solutions like full automation, big data analysis and artificial intelligence are increasingly being ...

SEMI-Related

AI Recognizes COVID-19 in the Sound of a Cough

Again and again, experts have pleaded that we need more and faster testing to control the coronavirus pandemic – and many have suggested that artificial intelligence (AI) ...
