

INVITATION: October 14, 2021

Netherlands – Taiwan Semiconductor Dialogue Advanced Packaging

The Dutch and Taiwanese semiconductor industries have a long history of cooperation, are interdependent, and are strong trade partners. The Netherlands- Taiwan Semiconductor Dialogue is a series of events that aim to strengthen the bonds between Dutch and Taiwanese Semiconductor industry.

The theme for this webinar is 'advanced packaging'. Advanced packaging is an increasingly more important topic because of the latest generation of even smaller chips, photonic ICs and 3D integrated chips. During our webinar we will give the floor to four keynote speakers from both Taiwan and the Netherlands to share their views and how their technology contributes to advanced packaging.

B2 Match Platform

The goal of our webinars is to introduce Taiwanese and Dutch semiconductor industry to each other and strengthen the bonds within the semiconductor supply-chain. To facilitate meetings between Dutch and Taiwanese companies we introduce you to the B2 Match Platform.

If you want to register on the B2 Match Platform, and participate in the matchmaking event from October 04 - December 30, 2021, for one on one meetings with Dutch and Taiwanese companies, [please register your company here](#). After registering you will find a list of participating companies.

This service is offered 'free of charge' and made possible by the Dutch 'Rijksdienst voor Ondernemend Nederland'.

We are looking forward to taking you on this journey and introduce you to new markets!

We hope to welcome you online on October 14, 2021!
