Themed “Elevating Vietnam to the Global Semiconductor Supply Chain,” the inaugural SEMIExpo Vietnam 2024 was held at the Vietnam National Innovation Center (NIC) - Hoa Lac Campus. The event featured a comprehensive two-day program with forums, keynote & industry sessions, student bootcamp, and an exhibition, all aimed at highlighting Vietnam’s growing role in the global semiconductor industry. It also focused on fostering R&D and nurturing start-ups, which are key to the ecosystem’s growth and Vietnam’s development.

With strong support from partners and sponsors, SEMIExpo Vietnam 2024 set the stage for continued collaboration and knowledge-sharing, proving instrumental in uniting stakeholders to advance semiconductor innovation, overcome challenges, and drive sustainable growth across the industry.

POST SHOW REPORT

Keynote Session

The Keynote Session spotlighted Vietnam's expanding role in the global semiconductor supply chain.

Esteemed thought leaders, industry experts, and policymakers shared insights on Vietnam's journey toward becoming an influential semiconductor player, highlighting strategic initiatives for innovation and sustainable growth.

Exhibition

For the first time at SEMIExpo Vietnam, we introduced an exhibition component, creating a vibrant platform where industry leaders showcased the latest advancements shaping the semiconductor landscape. The exhibition also included university booths, allowing students to explore academic pathways and specialized programs in semiconductor studies.

Notable Exhibiting Companies

- AGC Asia Pacific
- Cadence
- Google LLC
- Infineon Technologies
- Intel Products Vietnam
- Kulicke & Soffa
- Lam Research
- Marvell Technology
- NI/Emerson
- Qorvo
- Siemens Ltd.

Industry Session

Session Supporting Partner

Kingdom of the Netherlands

The Industry Session provided a dynamic platform for exploring Vietnam's integration into the global semiconductor supply chain. This session offered insights into how Vietnam is positioned to become a crucial partner for both regional and international semiconductor players.

Advancing IC Design and ATP Frontier in Southeast Asia Forum

The Advancing IC Design and ATP Frontier in Southeast Asia Forum provided an in-depth look at advancements in IC design and ATP crucial for the region's semiconductor growth. Experts discussed evolving design methodologies, innovative ATP techniques, and practical solutions to overcome current industry challenges.

POST SHOW REPORT

Workforce Forum

The Workforce Forum facilitated critical discussions on global workforce training collaborations within the semiconductor sector. This event offered a unique platform for attendees to connect with industry experts, explore career pathways, and gain insights into the skills and training needed for success in the semiconductor field.

Networking Dinners

The Networking Dinners provided an exclusive opportunity for industry leaders and professionals to engage in meaningful conversations about the latest trends and opportunities in the semiconductor and electronics sectors, and form valuable business relationships in a relaxed environment.

TalentCONNECT | SEMI TECH Zoomers Bootcamp

These student programs offered a robust introduction to careers in the semiconductor industry through two key programs.

TalentCONNECT facilitated networking by connecting students with industry leaders, laying a foundation for future career opportunities.

Meanwhile, the SEMI TECH Zoomers Bootcamp provided students direct exposure to industry practices and advanced technology. Together, these initiatives aimed to equip the next generation with essential skills and connections for success in the semiconductor field.
