**TALENT
FORUM**

BUILDING A DIGITAL FUTURE

Connecting the Industry with Exceptional Talent!

The SEMI Talent Forum is the premier platform for university students to learn about the microelectronics industry and how technology is impacting the global workforce

Students can meet with representatives from leading companies and take part in the SEMI Technology Playground exhibition area including a career café and technology demonstrations

The SEMI Talent Forum is a great opportunity to promote your company's diversity and inclusion initiatives, and address the growing challenge of onboarding new talent

Join us in TU Dresden, Germany to explore the industry's most pressing topics and support SEMI's global efforts to raise awareness about the exciting career opportunities in the microelectronics industry

TESTIMONIALS FROM STUDENTS

“SEMI Talent Forum provided me with an invaluable opportunity to delve deeper into the semiconductor industry. There were many aspects I was unaware of; I knew semiconductors were in my phone, but learning about the jobs, the people, and the processes behind it was incredibly intriguing. Additionally, I was fascinated to discover that it is almost a 1 trillion dollar industry.”

Erie, electrical engineering student at Swansea University

“The SEMI Talent Forum has been not only very insightful but also reassuring and encouraging. It's clear that there are significant opportunities to make a real impact on society. I've also noticed a strong commitment within the industry to develop talent, alongside efforts to acknowledge the importance of including our multicultural community in our workforce.”

Heaklig Ayala, engineering student at University of Warwick

“The SEMI Talent Forum at Swansea University, organized by SEMI Europe, allowed us to delve into the future of innovation in Europe's semiconductor supply chain, share with bright young talent, and discuss career opportunities in microelectronics. We are grateful to have showcased Comet's vital role as a plasma control and X-ray inspection system solutions provider, both frontend and backend.”

Isabella Drolz, VP Product Marketing, Comet Yxlon
