

BIOGRAPHY

SMC Korea 2025

Name: Inhee Lee

Title/ Position: Program Director

Company: imec

Inhee Lee is the program director for Active Memory of imec in Belgium. With nearly 25 years of experience in the semiconductor industry, Inhee has held various influential roles throughout his career and has gained international exposure. He has lived in US, Asia, and is currently based in Leuven, Belgium.

Previously, Inhee served as a senior director for development of DRAM product at SK hynix. During his 10 years at SK hynix, he led teams for development of 1b Tech nodes DRAM and HBM3E, and was also responsible for the R&D of next generation DRAM/NAND, as well as future memory technology roadmap.

Prior to working for SK Hynix, Inhee had worked for Samsung, Intel and GlobalFoundries more than 10 years to develop 14nm/22nm/28nm Tech nodes including packaging process such as TSV, bump, and FBGA.

Inhee received his Ph.D. degree in materials science and engineering from Ohio State University, USA.
