## INFORMATION SHEET

Subscription Portal for Access to All SEMI Standards.

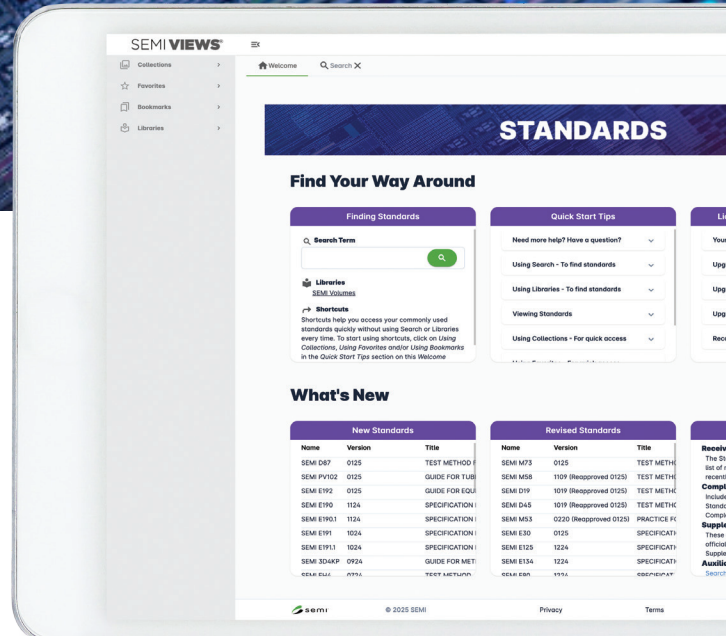

For over 50 years, the SEMI Standards Program has provided mutually agreed-upon definitions and product specifications for every aspect of semiconductor manufacturing, from fabs, equipment parts to process steps.

Staying current with the latest standards is essential to maintaining competitiveness and cost-effectiveness. SEMI's all-inclusive subscription delivers our complete library of up-to-date Standards. Our intuitive interface streamlines your operation, eliminates upkeep and ensures alignment with changing requirements.

FREE 30-DAY TRIAL

\*Free trial provides access to the SEMIVIEWS<sup>®</sup> portal and the first page of each Standard.

### “READER” FEATURES

- Live, online access to new volumes library (and archived older Standards)
- Intuitive UI enhanced navigation & usability
- Dynamic landing page for latest Standards updates, events and resources
- Enhanced search to quickly find what you need
- Improved navigation pane for quick, personalized access to collections and favorites
- Access to select translated documents in Japanese, Korean, simplified and traditional Chinese
- Multi-seat access for global collaboration across departments

### “READER +” FEATURES

- All the benefits of a Reader subscription, plus...
- Save as PDF
- Offline viewing & print any Standards

## ABOUT SEMI STANDARDS

SEMI Standards, with more than 5,000 global volunteers and 2,000 participating companies, are the oxygen for microelectronics manufacturing innovation. More than 1,000 Standards and Safety Guidelines have been developed on key topics including safety, materials, automation, packaging, traceability, and cybersecurity. For 50 years, SEMI Standards have helped reduce manufacturing complexity, which enables customer cost reduction, improved supplier quality, and shorter time-to-market. Each year, more than 1,000 companies purchase and use globally adopted SEMI Standards to improve manufacturing operations, influence the procurement process, and support new workforce training.
