

# UK Taiwan Critical Minerals Resilience Summit

We are pleased to invite you to attend the **Critical Minerals Summit**, taking place on **24–25 March 2026 8:30-16:30 each day**, at **Conference Room 5, Taipei World Trade Center (Address: 2F, No. 5, Section 5, Xinyi Rd, Xinyi District, Taipei City)**. The Summit is hosted by the **British Office Taipei**, in partnership with **TAG International, SFA (Oxford)**, and the **British Geological Survey**.

Across two days of discussions, keynote addresses and expert panels, the programme will examine global critical minerals strategies, Taiwan-specific supply chain vulnerabilities, upstream resource cooperation, and midstream manufacturing and materials risks, with a particular focus on semiconductor value chains and economic resilience. Sessions will combine strategic policy perspectives with technical and industry expertise to identify opportunities for collaboration, investment and innovation.

In support of the event, and on behalf of the British Office Taipei and partners, we would also greatly value your views on critical minerals as part of a study being conducted to help inform Summit discussions. We would be grateful if you could complete the following short survey, which will take no more than 10 minutes:

[CONTRIBUTE TO THE SURVEY →](#)

Survey findings will help ensure that sessions reflect current industry and policy perspectives.

If you are interested in attending, please confirm your participation by clicking on this link and further details will be provided. Please note that this is a closed-door event and we kindly ask that this invitation is not shared more widely.
